OUR MISSION

Nowadays, parents are busier than ever. They keep rushing from one job to another. bGuard is here to make their lives less stressful. bGuard monitors not only the air quality of the baby's room but also the baby's health. Thanks to its special shape it prevents the baby from rolling. Thus bGuard lowers the risk of Sudden Infant Death Syndrome.

STRESS RELIEF FOR PARENTS

bGuard assures you that your baby's okay and gives you the opportunity to relax more.

INTERACT WITH YOUR BABY

We make it possible for you to sooth your baby when crying with personalised voice messages recorded with your smartphone.

KNOW WHEN SOMETHING IS WRONG

By monitoring not only the air quality but also the baby's pulse, your baby gets the best possible security and growth environment.
