

European Project Semester 2019:
Smart Companion Pillow

bGuard is a multifunctional product that gives parents the information they need about their baby's health and sleep environment.

A project by
Alexandre Reis, Elien Gielen, Ko Wopereis,
Marcel Pasternak, Tobias Schneider, Vaido Sooäär

TRACKING

The bGuard Home Station and Smart Sock are constantly tracking the baby's health and the air quality of the environment while he is sleeping.

NOTIFICATIONS

When a value falls out of the preset range, the bGuard app sends you a notification. This way the parents always know when something is wrong.

INTERACTION

The bGuard mobile application also lets the parents know when the baby is crying. It allows the parent to send a recording to the baby to calm him.

**SLEEPURITY FOR YOU
AND YOUR BABY**
